WELDED ADVENTURE BOATS

20 BOAT
21 GUIDE

Purpose built for your next adventure

LAKE  RIVER  OCEAN

MASTERS OF THEIR CRAFT

Hand built by the best in the world of heavy gauge. KingFisher Boats are designed for those who embrace the entire world of boating. Our hulls deliver exceptional power, stability, and toughness; while still delivering a smooth, dry performance ride. Simply put, KingFisher Boats allow you to navigate where you want, when you want.

PRE-FLEX® HULL TECHNOLOGY BENEFITS

WE DESIGNED A BETTER BOAT

Every one of our heavy gauge welded boats begins with the Pre-Flex® hull — and it's what makes them so impressive.

The Pre-Flex® concept has been around since the dawn of architecture. It's simple, really: when you arch a structure towards the load, it strengthens the structure's capability to handle the load.

NON-FLEXED BRIDGE DECK WITH NO LOAD

NON-FLEXED BRIDGE DECK WITH LOAD: INTEGRITY COMPROMISED

FLEXED BRIDGE DECK WITH NO LOAD

FLEXED BRIDGE DECK WITH LOAD: INTEGRITY PRESERVED

We form each hull with "Pre-Flexed" components. As a result, everything the driver interacts with is designed for serious boating; unparalleled strength, impact resistance, sound dampening, superior fuel efficiency and most importantly, a smooth and responsive ride in any kind of water.

Start building your dream boat today. Visit kingfisherboats.com

PERFORMANCE DATA DISCLAIMER:

The performance data contained in this Boat Guide is approximate and should be used as a guideline, rather than relied upon as actual performance. The exact performance of your boat can differ from the data in this Guide due to several factors and variables. These factors include, but are not limited to, the final weight and weight distribution of the vessel, wind and water conditions, temperature, humidity, elevation, bottom finish, installed options affecting wind or water drag, and operator experience. Performance will also vary greatly based on specific engine/propeller selection, of which only one configuration per boat is shown in this Guide. KingFisher Boats reserves the right to change the specifications and performance data in this Boat Guide without notice.

Although every effort is made to ensure the accuracy of this catalog, products and equipment shown throughout may not be exactly as they appear. Also, boats may be shown with optional features. KingFisher Boats reserves the right to make changes at any time, which may not be reflected in this printing. For complete and up to date information, please check with your dealer.

NEW!

HELM MASTER^{EX}

GREATER CONFIDENCE ON THE WATER

Helm Master EX offers boaters customizable, integrated boat control with more ease and convenience than ever before. Available for single through quad applications, Helm Master EX brings ultimate boat control and fishability to a wider variety of boaters. Compatible with Yamaha Digital Electronic Control models from 150hp to 425hp.

JOYSTICK

Features modern styling, premium feel and optimal ergonomics, while providing smoother shifting and single-function buttons for intuitive operation.

DIGITAL ELECTRIC CONTROL (DEC)

Redesigned with a sleek new look for greater ergonomic comfort and new capabilities for boaters who may not want the full Helm Master EX suite of capabilities.

YAMAHA'S DIGITAL ELECTRIC STEERING (DES)

Can now be added to most current Yamaha DEC-controlled outboards for single through quad installations, and offers a clean, more spacious bilge.

FRONTIERS

FROM THE BIG COAST CAPTAIN'S BLOG

Frontiers are all around us in boating. By definition, frontier is a nation's furthest settled or inhabited region. It may also be a limit of advanced knowledge. Or simply a state of mind.

For decades I've been fascinated by the concept of frontier and liberally applied the concept to all nautical adventures. It's a highly personal thing as individual frontiers remain vastly different and unique.

For the novice boater, you're pushing frontiers with that first vessel purchase, first day cruising or inaugural salmon troll. As you gain experience you're pushing boundaries. Perhaps crossing the Georgia Strait, making the run up Sunshine Coast or launching in Port Alberni and running out Barkley Sound in search of bottom fish or a Broken Group paddle. Could be just getting in and out of Prince Rupert harbour!

The common denominator in this outward movement of frontier is a boat, ship or yacht. Once you've made the investment in a marine lifestyle there is no going back. Right there you have it. The means to up your adventure game and push frontiers you didn't even know you had.

I've been fortunate to push the limits of water-based adventure my entire life. Paddling. Boating. Yachting. Cool stuff on the water. Fresh or saltwater makes little difference.

But when it all really started clicking was just over a decade ago and the moment I launched my first KingFisher 2725 Offshore. The aluminum coastal boat class was just gaining momentum and that 2725 was set to take me places I could only imagine. Not only could it handle a variety of conditions, you could drop anchor or tie up dockside and the boat provided creature comforts akin to any camper setup.

Lo and behold, the perfect tool to explore and travel entirely new places.

All these years later we've certainly upped the frontier game. From running the BC Inside Passage to dropping anchor in Alaska. From trolling tuna 100 miles off Bamfield to the boat and paddle board trip I did to Chatterbox Falls with my wife this fall. Frontiers are always right in front of us. And often not as far as we might believe.

The emergence of the aluminum coastal cruiser has been a true game changer and KingFisher's steadfast commitment to building fine offshore boats an unparalleled success story. The Offshore series ranges from the 2525 all the way up to the latest 3425 GFX, and any of these prized KingFishers are prime sport utility boating tools to help drive your personal frontier.

Whether you're a veteran mariner or boating novice, there has never been a better time to add a KingFisher Offshore to your repertoire.

In recent months, more people have turned to boating in record numbers. "Fewer faces and open spaces," you say? "The wide open Pacific beckons like never before," I reply.

There has never been a better time for boating British Columbia... and finding frontiers!

Planning for a FISHING ADVENTURE

In search of the bite there are no guarantees, but there are a few things you can do in preparation to make your day run a little smoother. Let's go back to the basics and refresh before the 2021 season.

ROD

Step one: know your target. If you're casting for bass, or trolling for salmon offshore the material, length and action of your rod are paramount. Like an artist selecting the right paint brush, rod selection is the most important thing before heading out on the water.

- **Material:** most fishing rods are made from fiberglass or graphite. Fiberglass is known to be more durable, and graphite is lighter and stiffer. Choose the rod that best suits your target.
- **Action:** know when you've got a bite. Action is the rod movement that occurs from the lure or bait, and more drastically when you've got a fish strike, or a fish on.
- **Length:** KingFisher Boats are all geared with 10' plus rod holders and lockers. With plenty of 'dance floor' you can comfortably choose the rod length that best suits your target.

REEL

When you've got a trophy on the line, a comfortable reel can be the difference between landing the monster or a fishing tale gone awry. A few things to keep in mind about your reel.

- **Price:** expensive reels provide either smoother action or improved ruggedness—or both. Experienced anglers will tell you that a reel that operates smoothly while casting, retrieving and fighting a fish is well worth the extra cost and comfort
- **Spool Capacity:** when choosing a reel, consider the weight and capacity of line you'll need for the fish species you're after. Deep, V-shaped or skirted spools can take longer or heavier line while shallow spools are easier to cast because the line comes off more easily.
- **Saltwater vs. Freshwater:** reels intended for saltwater are pricier because they use corrosion-resistant materials. Keep destination in mind.

LINE

Your line connects you to that trophy catch. Most lines can withstand hundreds of pounds. However, stronger isn't always better. Like selecting the perfect rod, you must select line that suits your target. Things to remember:

- **Flex:** less stretch results in more sensitivity to feel the fish. Trolling anglers might want moderate stretch because it may be the difference between hooking the fish or ripping the hook right out of its mouth
- **Strength:** your line test should match the weight of the species you're targeting.
- **Bait-casting:** choose lighter and more sensitive line for this active style of fishing. Targeted species are smaller and you don't want to miss that bite.

REGULATIONS

From neon worms to stinky fish oils to squishies — bait is a big question for every angler. But, more important than personal preference, are conservation requirements.

Before you head out make sure you have your license and are prepared to follow local and federal guidelines.

Protect the future of fishing and abide by bait restrictions. Get education on species size restrictions and daily limits.

ETIQUETTE

No matter the water, be respectful of those around you. Avoid crowding and stay aware of their proximity.

SNACKS

If the bite is hot the last thing you'll want to do is head in for provisions. Bring plenty of drinks to stay hydrated and snacks for the crew. Depending on your superstitions, the jury is out on bananas.

PERSONAL FLOTATION DEVICE

On the water, the unexpected can happen. Stay safe and wear a personal flotation device at all times.

Your dealer is the ultimate resource. Bend their ear on your local region, regulations, and hot tips.

› **Sporty stylish design** → clean profiles and smooth lines for beautiful aesthetics including upswept bow and wide gunnels

› **Extend your season** → bulkhead with heavy duty locking door, cold weather headliner, suspension seats and in-floor storage

› **Fun, fishability and safety** → more cockpit space with a full width motor bracket, convenient exclusive folding transom step-thru, fish lockers with pump outs, and EZ Clean diamond deck floor upgrade

MERCURY *GO BOLDLY.®*

THE ALL-NEW

250-300 hp Verado®

REFINED POWER, PERFORMANCE AND EFFICIENCY

- Ample torque from class-leading 4.6 L displacement V-8 powerhead
- Superior hole shot and acceleration from Transient Spark technology

MORE INNOVATIVE AND MORE OPTIONS

- Mercury-engineered digital controls and electro-hydraulic power steering for smooth operation
- Compatible with Mercury Joystick Piloting for Outboards for maximum maneuverability
- Enhanced driving experience through Adaptive Speed Control
- Class-leading charging output and battery-management
- Exclusive Advanced Sound Control technology
- The industry's only Top Cowl Service Door makes maintenance easier
- Wide variety of color options to personalize your engine

Mercury Verado: The world's most refined outboard
Learn more at MercuryMarine.com/Verado

COWL SEALING SYSTEM

Multiple sealing features prevent engine noise from escaping the cowl and keep moisture out

NOISE MANAGEMENT

- Tuned multi-chamber air intake minimizes airborne noise
- Fuel injector covers reduce high-frequency noise
- Multi-chamber idle relief system tuned to provide lowest idle noise

NEXT-GENERATION ADVANCED MIDSECTION

- Multi-piece weld reduces weight and size
- Perimeter mounts provide industry-lowest vibration
- Sound barriers make V-8 Verado the quietest outboard in its segment

ADVANCED SOUND CONTROL

- Allows users to toggle between ultra-quiet operation and a "throatier" sounding sport mode

IN LIKE FLINT

A KINGFISHER FISHING STORY FROM 'DOCTOR' GORD PYZER

Put eight avid anglers around the breakfast table at Temple Bay Resort on famed Eagle Lake in Northwestern Ontario's Sunset Country, and you can bet the fishy discussions will flourish. That's what happened last Sunday morning, when I joined the KingFisher Boat team from Vernon, BC for two and a half days of fun fall fishing for walleyes, smallmouth bass, northern pike, and muskies.

Buddy John Butts, only the second Canadian angler ever to win an event on the Professional Walleye Trail (PWT), grinned and fired up the conversation by asking *"how important do you think lure colour is when selecting a bait?"*

Now, I've always contended that the colour of your lure is meaningless until you locate the fish. After you've found them, you then have to determine the depth at which they are swimming, the speed with which they want you to present your offering, and the preferred size and shape of your lure. So, the colour of your bait is way down the list of priorities.

But—and it is a big but—once you get these initial priorities out of the way, choosing the turn-on colour can make a huge difference in your success.

However, I knew that John had spent a couple of days on the water, scoping it out in advance of our arrival. So I was certain he had some aces stuffed up his sleeve. Those aces ended up being

1/4- to 3/8-ounce jigs, tipped with lively minnows, fished close to the bottom and popped up gently. Oh, did I mention, the jig also had to be brown?

In hunting circles, it's often said that *"if it's brown, it is down,"* but this was the first time I can remember walleyes preferring brown coloured jigs over one of the more traditional shades. And I wasn't going to argue with the fish.

So I tied on a Reel Bait Flasher jig that I had crudely painted brown to each of the rods I had on the deck, and handed one to Brad and the other to Dante, who were both joining me that day. Then I tipped each jig with a lively minnow, pinning it lightly between the lips, and we lowered them over the side.

"Got one," Brad said, within seconds of his jig touching the bottom, and I turned around to see his rod buckling under the weight of a nicely-sized walleye that I quickly netted. Before I could get it untangled and back into the water, Dante hollered that he had one, too, and the fire drill went into operation.

It stayed like this, fast and furious, throughout the day, with more brown-jig-caught-walleyes than I cared to count coming over one side of the boat

and promptly going back over the other side—save for a few small eaters that we kept for a scrumptious shore lunch.

As a matter of fact, the action was so frenetic that Mike Clements (who was fishing only a few feet away in KingFisher pro staffer Dave Bennett's 2025 Flex Sport XP), set the hook into a beautiful 40-inch muskie. Unbelievable. Eagle Lake is renowned for its muskie fishing, and there were plenty of hard-core muskie anglers out on the water casting and trolling big toothy critter lures. Mike landed his first ever muskie, as an unintentional bonus, on a brown-coloured walleye jig.

The next morning at breakfast, John sauntered to the table, pulled up a chair, sat down, retrieved a package of jigs from his pocket, and asked with the same sly grin from the previous day, *"who has pink jigs in their tackle boxes?"*

For a change of scenery from the previous day, and to show the boys from BC some of the diverse fishing opportunities Sunset Country is famous for, we had decided to visit nearby Lac Seul. So, was John saying that the big walleyes there wanted **pink jigs**, after we had walloped their brothers and sisters on Eagle Lake using brown-coloured lead heads?

You'd better believe that was what he was saying.

Gotta confess, I like to take the path less travelled, although I usually need to see something firsthand before I believe it. So while KingFisher Boats CEO Byron Bolton and Flint Laroye dabbled pink minnow tipped jigs over the side, I showed the fish a spirited chub lip, hooked to a drop shot rig.

Byron and Flint handily outperformed me, hauling in one big walleye after another, until I ran the proverbial white flag up the pole, surrendered, and tied on a pink jig as well. It was only then that I kept pace with them, although Flint still crushed both me and Byron, hooking fat-bellied fish as fast as he could bait his jig.

It proved that after you sort out the ever-critical decisions about depth control, speed control, size and profile of your lure, the colour of your bait can factor heavily into the day's success. And when you get it right, well... you're in like Flint.

Gord Pyzer

GREEN IS THE NEW BLACK

ADVENTURES OF SEA LIME PIE

August 3rd, 2018 was the day that a beautiful 2019 Electro Green KingFisher 1775 Extreme Duty jet boat entered our lives; it was the perfect boat and the perfect colour. We have owned several recreational machines over the years and this boat is by far our favourite.

Our maiden voyage was on the Nechako and Fraser Rivers and it was a day full of adventure and relaxation. We spent the first part of the day learning the boat and getting a feel for it. After some time, we put it to the test and tried out some skinny back channels and we were blown away by how little water it will run in. Even in a mere six inches of water it is truly a wicked, very capable boat.

Our boat has taken us to many absolutely gorgeous areas over the past year and a half as we have used it for exploring, fishing, and hunting. Our favourite destination so far was the breathtaking Kinuseo Falls in Tumbler Ridge; which measure 197 feet (60 metres), slightly taller than Niagara Falls; a definite must-see.

We look forward to many more years of adventures and exploring out on the water.

Kaitlin & Ben Gibbons

Owner REFERRAL PROGRAM

We know you love your KingFisher. We want your friends to love their new KingFisher too. Share your passion and recommend your qualified referral to your KingFisher dealer. Your referral can get you free winterization, electronics upgrade and so much more.

AWARDS:

\$500 in-store gift certificate: Sport Series

\$750 in-store gift certificate: River Jet, Coastal and Multi-Species Series

\$1000 in-store gift certificate: Offshore Series

REFER A FRIEND IN A FEW SHORT STEPS:

1. Visit kingfisherboats.com/referral-program
2. Input your address, so we can send you some cool KingFisher swag.
3. Refer your friend. Their information is sent to your purchasing dealer.
4. Hang tight! Should your referral turn into a sale, you receive in-store rewards.

Terms & Conditions

This program is specially designed for current KingFisher owners to refer qualified owners to KingFisher dealers. The referral guest must visit a KingFisher dealer in-store. All referrals must be confirmed by a KingFisher dealer to be eligible for awards. Program available to KingFisher owners in the U.S. and Canada only. KingFisher Boats reserves the right to change the qualifying gifts, alter or discontinue this program at any time without notice. Unused in-store credits cannot be redeemed for cash.

TO REFER, VISIT KINGFISHERBOATS.COM/REFERRAL-PROGRAM

For more information, please call KingFisher Boats at 250-545-9171 or e-mail info@kingfisherboats.com

At KingFisher Boats, our purpose is to enrich lives while spending time on the water. Since childhood, I have had a passion for everything from racing river boats, to lake fishing with my family, to chartering an overnight offshore adventure with close friends. This passion is shared with everyone at KingFisher. Each boat is built by hand, one at a time, by skilled craftsman and designed with you in mind.

I look forward to seeing you on the water sometime soon. Have a trophy day.
